

CROWN In A DAY

CEREC Restoration vs. Traditional Restoration

- *Convenience* – by using **CEREC** technology, your new crown will be completed in a single visit to our office
- *Technology* – State of the art software is used to create your new **CEREC** crown
- *Esthetics* – Enamel-like material is used to make the new crown, giving you a natural look and feel
- *Comfort* – no temporary restorations or crowns are needed, saving you time

CEREC restoration services are a superior method of creating precisely designed, color matched, and highly durable ceramic restorations (crowns) right here in our practice.
